DETAILED ACTION

Response to Amendment

1. In response to the amendment received June 20, 2007:
 - a. Claims 1-18 are pending;
 - b. The prior objections and rejections have been overcome in light of the amendment.

Information Disclosure Statement

2. The information disclosure statement filed September 5, 2007 has been placed in the application file and the information referred to therein has been considered as to the merits.

Allowable Subject Matter

3. Claims 1-18 are allowed.
4. The following is an examiner's statement of reasons for allowance: none of the prior art of record are considered to reasonably teach, suggest or render obvious the invention of claims 1-18.

Upon further consideration of the amendment in light of the prior art of record the Examiner agrees that JP 2001-266910 does not reasonably teach, suggest or render obvious the claimed diffusion layers and comb teeth structure, and particularly that the claimed diffusion layers themselves comprise the claimed comb teeth structure. Rather the comb teeth structure of JP '910 is an insert which is separate and distinct from the claimed diffusion layer.

Art Unit: 1745

None of the remaining prior art of record, alone or in combination, are held to reasonably teach or suggest at least this claimed arrangement.

Thus the claimed invention is held to be novel over the prior art of record and is deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
